

## **SCHOTT MORITEX releases “ML-U MP9” series of Fixed Focal Length lenses for large sensors**

**Fixed focal length lenses are designed for 9-megapixel, 1-inch camera sensors and applications involving high-precision inspections**

*Tokyo (Japan), August 28, 2014* – SCHOTT MORITEX, a manufacturer of machine vision systems and image-related equipment, is currently launching the “ML-U MP9” series of fixed focal length lenses for large sensors and applications involving high-precision inspections. The lenses offer the high resolution required to maximize the use of the latest 9-megapixel, 3.6 µm pixel pitch sensors.

In recent years the machine vision market has increasingly shifted towards larger sensors and higher resolutions in order to meet the market requirements for reduced takt time via higher resolution, improved recognition, and wider fields of view. In response, SCHOTT MORITEX has developed its "ML-U MP9" series of high-performance fixed focal length lenses, which offer the high resolution required to maximize the use of the latest 9-megapixel, 3.6 µm pixel pitch sensors. These lenses also support image circles of up to 1 inch for compatibility with the larger sensors. In conjunction with the latest 9-megapixel sensors, these lenses enable high-resolution imaging and more than 30% wider fields of view than the company's previous series of lenses for 2/3-inch sensors.

SCHOTT MORITEX plans to release a total of six different lenses in the "ML-U MP9" series with focal lengths ranging from 12.5 mm to 75 mm.

**Technical features:**

- Six models with focal lengths ranging from 12.5 mm to 75 mm
- High resolution for use with 9-megapixel cameras
- F1.4 to F1.8
- Maximum imaging circle/sensor width: 1 inch/16.8 mm

**SCHOTT** is an international technology group with 130 years of experience in the areas of specialty glasses and materials and advanced technologies. SCHOTT ranks number one in the world with many of its products. Its core markets are the household appliance, pharmaceutical, electronics, optics and transportation industries. The company is strongly committed to contributing to its customers' success and making SCHOTT an important part of people's lives with high-quality products and intelligent solutions. SCHOTT is committed to managing its business in a sustainable manner and supporting its employees, society and the environment. The SCHOTT Group maintains close proximity to its customers with manufacturing and sales units in 35 countries. Its workforce of 15,400 employees generated worldwide sales of 1.84 billion euros for the 2012/2013 fiscal year. SCHOTT AG, with its headquarters in Mainz (Germany) is owned by the Carl Zeiss Foundation.

**SCHOTT MORITEX**, integrated into the SCHOTT Business Unit Lighting and Imaging, develops, manufactures and distributes lighting and imaging solutions and supplies optical components and systems for machine vision, digital imaging and medical applications. SCHOTT MORITEX Corporation is listed on the first section of the Tokyo Stock Exchange. SCHOTT AG holds 71.6% of the shares of SCHOTT MORITEX Corporation.
